We will start the briefing of the human salvation project (Nunoa).

First, we'd like to thank the queen and everyone here for helping keep the secret of our organization for the better good of mankind during the last 298 years.

Through numerous tests and experiments, we wereable to produce many vaccines and viruses to optimize and reduce the world population to 500,000.

We were also able to take control of the world market finances and the resource technology.

Recently, we developed an artificial magnetic field that allows us to control the weather and the climate in seven different levels. As a result, we have the power to create and control earthquakes, hail, and even tsunamis.
